John DeBusk is Vice President, Engineering and Product Development, where he leads the product development and systems engineering operations for FreeFlight Systems. Mr. DeBusk has over 25 years of experience in the aerospace and defense industries. Most recently, he served as Vice President of Engineering at EFW Inc., an Elbit Systems of America company, where he was responsible for structuring, growing, developing, and managing a 170 person-engineering department. Under his leadership, his team developed new products and performed systems integration for a wide variety of key programs including: F-18, V-22, AH-64, ARH-70, HH-60, M1A2, M2A3, and Viper Strike. Moreover, he developed the company's first, world-class engineering laboratories for weapons and systems integration. Previously, he held management positions at General Dynamics and Lockheed Martin, including Director of Operations and Chief Engineer for the F-16 and Director of U.S. Air Force Programs. Mr. DeBusk holds a Master of Science degree in Electrical Engineering from Stanford University and Bachelor of Science degrees in Electrical Engineering and Physics from Southern Methodist University where he graduated Magna Cum Laude and Cum Laude, respectively.
