

Service Information Letter

SIL FFS02

To: FreeFlight Systems (Trimble) Dealers, Service Centers and Customers
From: FreeFlight Systems Customer Service
Subject: FreeFlight (Trimble) NavData Services to be Discontinued for all non “PLUS” Navigation Systems

FreeFlight Systems has been notified by Jeppesen that NavData services for the GPS navigation systems listed below will be discontinued as of cycle 0813 (Effective Date: December 18, 2008).

- **TNL 1000 DC**
- **TNL 2000 / 2100 / 3000 / 3100**
- **TNL 2000T / 2100T / 3000T / 3100T**
- **TNL Approach 2000 / 2101 / 2101 I/O**

This was a difficult but necessary decision because FreeFlight and Jeppesen have exhausted all alternatives for producing databases that fit on the required edge cards. These units are engineered to accept 1 MB or smaller data cards, and the Jeppesen databases are exceeding these limits due to normal growth of aviation data.

For owners and operators of the TNL 2101 Approach Systems (p/n 81439-XX and 81440-XX, where XX = 00, 01 or 10), an upgrade to allow the use of a 4 MB data card is being developed and will be available in August of 2008. The upgrade will consist of a hardware modification, software upgrade and a new 4 MB datacard.

FreeFlight Systems is currently investigating the possibility of including the TNL 2000 Approach Systems (p/n 81438-XX, where XX = 00, 01, 10 or 11) in this upgrade.

Please contact FreeFlight Support for additional information.
